

FusionTech™

Who is Advanced Technology?

Advanced Technology is a manufacturer of MirroFlex decorative thermoplastic panels, FusionTech products and a distributor of NuMetal high pressure laminates. Our products are used in applications such as walls, wainscoting, ceilings, backsplashes, displays and furniture.

Headquartered in Greensboro, NC since 1979, ATI provides the hospitality, store fixtures, display and architectural & interior design markets with innovative solutions. Visit us online at advtechnology.com.

Advanced Technology and its partners are environmentally conscious companies. Please see our 'Green Story' on page 6.

Advanced Technology, Inc. is an
ISO 9001:2008 and 14001
Certified Company

What is FusionTech?

The FusionTech process, as the name implies, is literally the fusing of color or an image into Aluminum, FRP (Fiberglass Reinforced Plastic), Glass, Ceramic, Wood and Fabric substrates. The process embeds the image in the product, leaving the properties of the substrate.

Choosing a design from our extensive image library or submitting your own for a custom look offers endless variety.

Your imagination is the limit.

Our Journey Toward **Sustainability**

As a 34 year old brand, we understand sustainability is a journey of ongoing improvement and innovation.

As an ISO 14001 certified company, we are committed to continual improvement through our life-cycle approach to manufacturing and quality product design. From our selection of raw materials and maximization of material yields through our manufacturing processes and end of life management strategies.

We are investigating alternate methods of minimizing our off-fall through "waste-to-profit" networking where our manufacturing waste becomes material for another product.

Our commitments don't end at our door. We understand that our supply chain partners are part of our environmental footprint. We are working with our suppliers to reclaim their materials that go into our final product assembly – further minimizing the manufacturing waste that ends up in a landfill.

FusionSwirl

*As it plays beautifully with light,
the multiple colors in the design make
each a true work of art*

FusionSwirl is perfect for hospitality, store fixture, display, furniture and architectural & interior design applications.

Several designs from our stock collection are shown in this brochure. Our stock collection is continuously growing; please see the website to view the complete FusionSwirl collection. Since this is part of our FusionTech process, the colors for any design can be changed. We are also able to create a custom design, including the addition of logos or other graphics.

FusionSwirl contains a minimum of 40% post-consumer recycled content and can qualify for 2 Leed Credits under LEED V3 Section 4.2.

LuxCore

SHOWN Bamboo Rings, Weathered

A new dimension in translucent laminates

LuxCore is a proprietary translucent FRP panel imaged with ATP's FusionTech process. Available in endless combinations of designs and colors, LuxCore can be a translucent panel or, with an added backer, a laminate.

LuxCore Translucent Panels can be modesty panels, room dividers, door inserts, shower enclosures and other interior applications where translucency is desired.

LuxCore Laminates can be used as wainscot, wallcovering, table tops and other applications where high abrasion and impact resistance are required, such as hospitals, restaurants, retail stores, restrooms and elevators.

All LuxCore products pass sanitary codes, are easy to clean and are not damaged by water. They can be used for most vertical and horizontal applications.

Many of the stock images are shown here. Visit our website to see our complete line of stocked images or submit your own for a custom look.

SHOWN LuxCore Laminate with Aspen image and Golf Yellow background

Our LuxCore product is translucent, by design, and works perfectly for applications where filtered light is desirable.

LuxCore is backed with white in applications where it is desirable to conceal the surface behind the product, as with a wall application.

Please note that the stock images shown on pages 19-25 appear with a white backer, eliminating its translucent effect.

SHOWN Artwork,
FusionTech on Aluminum

Aluminum sheets have a satin finish and will keep their aluminum appearance. Aluminum is also available with a photo realistic process and is available in both gloss and matte finishes. The gloss finish is also dry erasable. Suitable for vertical and light duty horizontal applications. 4' x 8' sheets are coated with a scratch resistant proprietary coating and then images are added using the FusionTech infused color process.

FusionTech Aluminum has been used in many different applications; including walls, backsplashes, murals, artwork, signage and ceilings. FusionTech metal backsplashes have been approved by a number of house manufacturers for use in HUD certified designs calling for a limited combustible material.

You can also choose a design from our Image Library or submit your own for a custom look. A stock line of designs on unbacked 4' x 8' sheets is available (*see page 32*).

FRP

SHOWN Ceiling,
FusionTech on FRP

SHOWN FusionTech on FRP

FRP white panels can either be smooth or textured and are available in a variety of thicknesses and sizes. Images are added to the smooth FRP using our FusionTech infused color and coating process. FRP is also available with a photo realistic process and is available in both gloss and matte finishes.

This product is great for food preparation areas, bathrooms and other water environments. If you are tired of the traditional white, beige or gray FRP, this custom program is your answer.

The textured FRP is infused with a solid color and hundreds of colors are available.

SHOWN FusionTech on FRP

SHOWN Bartop, FusionTech on FRP (special order gloss finish)

Glass

Glass can be imaged for backsplashes, tabletops, doors, countertops and wall applications. Beautiful solid color or translucent glass can also be created with our infused color process and translucent glass can be backlit.

Different types of glass can be utilized in our FusionTech process. Our customer service department can discuss different types of glass with you and determine what is best for your application.

SHOWN FusionTech on Glass

Ceramic

Ceramic Tile can be infused with your images or images from our library. FusionTech Ceramic Tile has been used in different types of applications, including floors, murals and signage.

Any size of ceramic tile can be imaged. You can spread your image over several tiles for a mural effect or have an image on each tile. When needed, tiles can be sequentially numbered on the back to ensure easy installation.

Fabric

SHOWN Wall Mural,
FusionTech on Fabric

SHOWN FusionTech on Fabric

Fabric with the FusionTech process is ideal for unique wallcoverings, furniture wraps, upholstery, artwork and displays. Several different weights and weaves of fabric are available.

Our stocked fabric exceeds 30,000 double rubs in the ASTM D-4157 abrasion test.

You can submit your own image or choose from our Image Library. Imagine creating a tapestry hanging or a wood veneer headboard for a fraction of the cost!

VeneerBric is a stocked program with 30 veneer images infused on fabric, creating a “fabric veneer.” See page 46.

Ordering Process

The FusionTech Family of Products is available in endless combinations. Different substrates, stock or custom images and type of installation will all affect the information needed during the ordering process. ATI's Customer Service Department can guide you through every step of the process. Our art requirements are shown on the following page and also on our website.

Custom images will require approved samples before production and additional charges may apply. There are no minimums for FusionTech orders and all items are made in the USA in an ISO Certified facility.

FusionTech is one of the many products from ATI. Please call or visit our website to see the following:

MirroFlex

MirroFlex Structures are decorated thermoplastic sheets that are 3-dimensioned by a proprietary process. MirroFlex is also available in flat sheets.

NuMetal

Aluminum, copper and stainless steel clad high pressure laminates.

Customer Service

800 849-1320

Order Processing

If received by 10:00 am, EST, most orders will be acknowledged on the same day. FusionTech products are made to order and lead times will vary. ATI's minimum order amount is \$25.00 USD.

Return Policy

Only stock items can be returned. These items must be returned within 30 days of ship date and will incur a 20% restocking fee.

Conditions and Warranty Advanced Technology, Inc. believes all information contained herein to be correct. It is the responsibility of the fabricator/customer to completely test the adhesives and methods of fabrication to ensure that the results are satisfactory. ATI is not responsible for any fabrication or ancillary costs involved with using FusionTech products.

All shipments are to be inspected within 10 working days after delivery. We are to be informed in writing of any potential adjustment necessary. The seller's only obligation will be to replace product on a one-to-one basis. Neither the manufacturer nor the seller shall be liable for any additional damage or loss, directly or indirectly, arising as a result of using FusionTech products.

Slight imperfections and color variations can occur and are considered normal. Please inspect each product carefully before fabrication to ensure it meets your needs.

Cleaning & Care

Due to the variety of substrates used, please see the Technical Specs on our website at advtechnology.com/resource-center.

Storage

Store flat and acclimatize in the same environment for at least 24 hours before fabrication.

FusionTech™ Custom Production Art Requirements

Please provide the digital file in a 300 dpi resolution, RGB color and to avoid additional charges please provide the file full size at the size you wish to have it printed in final form. For example: If you wish to print a 48" x 120", best quality would be realized with a file @ 300 dpi 48" x 120" (14,400 x 36,000 pixels) RGB TIF format (or other accepted formats, see Accepted File Types section). If you cannot provide a full size image, you can get a reasonable quality in half size – if you provide a 300 dpi image done at 24" x 60" and we expand it to 48" x 120", the resolution on the finished piece will drop to 150 dpi. We recommend that you maintain at least 150 dpi, or order a sample for approval before running production at lower resolution.

Art Requirements:

We can accept artwork files that are generated from the following programs:

**Quark Xpress · Adobe Illustrator
Adobe Photoshop · Adobe Acrobat (PDF)**

Your document must provide bleeds if colors, images or graphic elements go to the edge of the final product. For bleeds, you must extend the artwork 0.125" (1/8th inch) beyond the final size. A text/content margin of 0.125" (1/8th inch) must be applied within the final size.

Accepted File Types

**TIF · JPEG · EPS · AI CS4 or earlier
INDD CS4 or CS3**

Electronic Layout Files:

We accept Macintosh files created with or editable by Adobe Photoshop® CS4 or lower, Adobe Illustrator® CS4 or lower, Adobe InDesign® CS4 or CS3. Please include all linked files, all screen and printer fonts with the high quality printout.

Documents should be created 100% to size, but can be enlarged as long as sufficient resolution is provided. All images should be RGB. We can read and write to CD or DVD.

Custom Spot Colors

For exact PMS color matches, we will be happy to provide our color charts for you to select from.

Suggested Color Space

We recommend Adobe RGB 1998 or sRGB.

Submission Methods:

FTP (Using FileZilla or another FTP client)
Host: **advtechnology.com**
User: **advtechnology_comImages** (capital I)
Password: **mirroflex1979**

Please put your name as part of your file name. Please send us an email once you've uploaded your file(s) with the project details, file name, and your contact info.

CD or DVD Discs

Advanced Technology, Inc.
Attn: Graphics Department
6106 W. Market Street
Greensboro, NC 27409
T: (336) 668-0488 or (800) 849-1320

Additional Charges

If artwork cannot be supplied as described above and additional computer work is required to produce the order, computer time will be billed at the following rates:

Minimum Charge \$100.00 – up to 1 hour; \$50.00 for each additional half hour

Please supply high quality "match to" outputs for 4-color images, PMS colors or swatches for spot colors. Crucial copy and signatures should be 1/4" from trim. Please maintain 1/8" bleed on all four sides to allow for cutting. All 4-color pixel artwork (Photoshop or other image applications) should be supplied actual size at 300 dpi or higher resolution. Enlargements require equally enlarged resolution.

Designers:

Smallest optimum size for copy is 12 point. Some fonts require a larger point size or bolding, especially if reverse copy is needed. Please provide type as "outlines" so that type conversion issues are avoided. If it is necessary to mix TrueType and Postscript fonts, please convert type to outlines.

Due to the thousands of existing fonts, we may not have the requested font in-house.

*Please note that Advanced Technology will not be held responsible for reproduction of smaller type than recommended.

Please send email correspondence to **info@advtechnology.com**
