

MirroFlex Light Diffusers

Finally! Dramatically enhance the look of drop ceiling systems using our contemporary light diffuser designs and add up to 30% brighter, more pleasing light.

Design Beyond the Surface

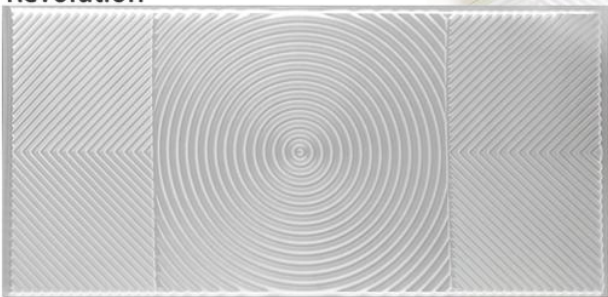

MirroFlex™ Light Diffusers are designed to replace existing prismatic diffusers in drop ceiling systems. Our patent pending Diffuser designs are ideal for office work environments because the light is directed from side to side and does not shine downward onto computer stations. Offices, hallways and other commercial spaces are visibly more appealing with MirroFlex Light Diffusers!

3 Contemporary designs to choose from!

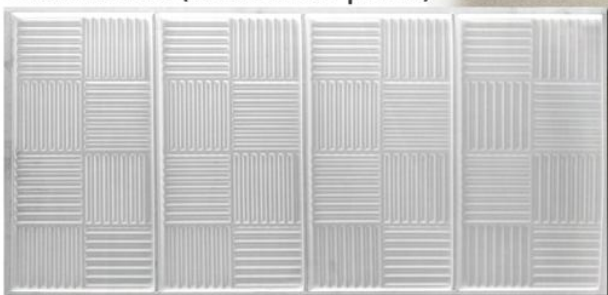

Wavation

Revolution

Basketweave (as shown in photo)

Before

Room was significantly darker

cooler, more pleasing light

brighter light around perimeter

30% more light at eye level

softer light at desk height
